

WHEN YOUR WORK TAKES YOU INTO PEOPLE'S HOMES...

- ★ Unscrew the lid of one of the 500ml spray bottles you have been given, and add one tablespoon (15ml) of Jik.
- ★ Fill it with clean water and close the lid tightly. (KEEP IT OUT OF THE REACH OF CHILDREN: if swallowed, give lots of water and go straight to the clinic, but don't make the child vomit.)
- ★ Put the bottle in your bag, together with a cleaning cloth and the right PPE for home visits (see below).

WHAT TO DO WHEN YOU ENTER A HOME...

- ★ Put on the right PPE for that home visit. Look at the table below for more information.
- ★ If you suspect or know that someone in the home has Covid, give them a **Type 1 mask** to put on.
- ★ Wash your hands if there is soap and running water, or rub them with alcohol disinfectant.
- ★ Unless you are directly caring for them, stay 2 metres away from a person who has a fever, or is coughing or feeling sick.
- ★ Use the Jik spray to wipe down any tables, bed or counters you may touch.

WHAT PPE DO YOU NEED?

PATIENT HAS KNOWN COVID INFECTION

Patient is very sick or coughing and your work requires touching him/her

Patient is not very sick and you won't be touching him/her

PATIENT HAS SUSPECTED COVID

NO ONE IN THE HOME IS SUSPECTED OR KNOWN TO HAVE COVID

	MASK			GLOVES	GLASSES	APRON	GOWN

FOR YOU			★	★			

* If N95 not available, use Type II mask
 ** If not enough Type I masks for patients, get them to use a cloth mask
 *** A face screen can be used instead of glasses

AS YOU LEAVE...

- ★ Leave the patient's mask with him or her!
- ★ Wipe the surfaces again with the Jik solution if you have done any procedures.
- ★ Wash your hands or rub them with alcohol disinfectant.
- ★ Put any contaminated items in a plastic bag.
- ★ Let the family know you care for them.

WHEN YOU GET HOME...

- ★ Take off the PPE carefully and dispose of it as you have been taught.
- ★ If you have running water, have a shower.
- ★ Relax and take time to be with your family.
